

# Warszawa chroni

**Alerting and warning  
residents about danger**

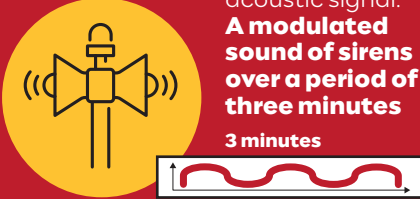

# How will you find out about danger? =

## 1. Alarm and warning system for the population

Emergency sirens

### ALARM ANNOUNCEMENT

acoustic signal:  
**A modulated sound of sirens over a period of three minutes**  
3 minutes

### CALLING OFF THE ALARM

acoustic signal:  
**A continuous sound of sirens over a period of three minutes**  
3 minutes

Voice announcements can also be made via the devices to inform about a danger and the desired behaviour.

## 2. Media - radio, television, internet

They will provide information concerning the danger and how to behave.

## 3. RCB Alert

An RCB alert is sent in emergency situations via a text message.

## 4. Regional Warning System - RSO

An RSO alert is sent in emergency situations after installing an app on your mobile phone.

## 5. Warsaw Notification System - Warsaw 19115

The system sends warnings concerning local hazards. It provides guides concerning providing first aid and how to behave during emergencies.

## Proceedings following an alarm signal

- Don't panic;
- Turn on the radio or TV, which will inform you what danger people are being warned about and what to do in this situation;
- Alert your neighbours who may not have heard the alarm.
