A pedestrian at a pedestrian crossing has priority, but REMEMBER, this does not absolve you from exercising caution.

1. Use pedestrian crossings

Only cross in designated areas. Drivers must exercise extreme caution in these areas.

2. Stop and look around

Before entering the carriageway. Look around carefully in both directions.

3. Observe light signals

Do you have the green light? Even then, make sure all drivers can see you and have stopped.

4. Focus - hide the phone!

When crossing the road, do not use your phone or other electronic devices.

5. Be visible - wear reflective elements

Particularly after dark or in difficult weather conditions, wear reflective elements. Visibility increases your safety!

6. Do not run into the crossing

Even if you have a green light, never run into a crossing. Give drivers time to react.

7. The tram has priority

A pedestrian entering a pedestrian crossing has priority over a vehicle, with the exception of a tram.
